

GUTS front end Test

Instructions

- Create a simple casino lobby by pulling games from the games.json file provided.
- Images can be found at <https://bay1.guts.im/newguts2/images/games/>"gameid".jpg (replace gameid with the gameid from games.json)
- Please use whatever technologies you feel you are best at however a front end framework such as react would be preferred.
- Please add a read me file with how to get the project running and any plug ins or extensions used.

Extras

- Responsive css
- Search for a game
- Filtering based on "gameType"
- Anything you feel would be nice.

Any questions feel free to ask.
